This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFACE.

In submitting the annexed Tables for the Public patronage, the Author begs to state that, from the great increase of business in Railway Shares, it has become highly necessary that there should be a book for calculating that description of property.

A trial of upwards of fifteen years has convinced the Public that Railway Shares, if judiciously chosen, are not only a safe, but lucrative investment for capital.

The Work comprises a set of Tables for calculating Shares in Railway, Canal, Gas, Mining, Insurance, and other Companies, at any price from One-sixteenth of a Pound (or 1s. 3d.) per Share up to £310 per Share in value, in the following manner:—

At 1-16th of a £1. sterling, or 1s. 3d. per share, and advancing by 16ths to £10. per Share;

From £10 per share, advancing by 8ths, (or 2s. 6d.) up to £110. per Share.

And from £110. advancing by £5. per share up to £310. in value. And from 1 Share to 500.

The whole of the castings have been carefully checked and the accuracy of the entire Work may be depended upon.

Digitized by Google

The Work is applicable for casting Stock, as well as Shares, by considering each £100 Stock to represent one Share; also, for ascertaining the amount of Commission or Dividends upon Stock or Shares; and it will be found most useful in dividing Tickets, as it will show at a glance what would be the cheapest form of division. It will, in fact, from its comprehensive nature, be found almost universal in its applicability.

The Author has also added a Table of Income Tax to the Work, which he trusts will be found very useful; it commences with the fractions of a £ sterling upon which the Tax is charged, (the Government where the amount of Tax is any fractional part of a penny give the Public the benefit of such fraction,) and is continued to £50,000 per annum.

The Work will be found exceedingly useful to Public Companies, and to parties having to pay dividend upon Stock or Shares; the amount of dividend being found in the first or Share Tables, and the net amount after deduction of Tax in the Income Tax Tables.

53, THREADNEEDLE STREET, CITY
